Introduction

The operating system installed in Avtek interactive monitors is a modified version of the popular Android system. This system is used both for basic operation to the monitor (such as changing sources or volume levels) and offers a number of useful tools for education and business, which will be discussed later.

The device is equipped with a touch screen. To operate it, just touch the screen.

Initial system startup

At first launch of user receives possibility basic configuration of the monitor.

1. Select the system language.

| | | Avtek | | |
|---|---|-------|------|---|
| < | Language Please choose your language and region. | | | |
| | Magyar Magyarország | | | |
| | Italiano Italia | | | 2 |
| | Nederlands Nederland | | | |
| | Ротака Русский Россия | | • | |
| | | Skip | Next | |

2. Connect to a WiFi or Ethernet network to access the Internet.

NOTE: to connect to a wireless network, make sure the WiFi dongle or module is properly connected.

3. Configure the date and time of the device.

| | | Avtek | |
|---|--|-----------------------------|---------------|
| < | Date & Time S Please set the time and date to ensure normal u | ettings | |
| | Set Date & Time Automatically | | |
| | Set date | | 04/10/2020 |
| | Set time | | 14:19 |
| | Set timezone | GMT+02:00 Czas środkowoeuro | opejski letni |
| | Date format | 0 | 04/10/2020 |
| | ······· | Skip | Next |

4. Name the device.

| | | Avtek | | | |
|---------------------|-----------------------|-----------------------|------|---|--|
| | Please enter your dev | e Name | | | |

Basic operation

The main screen is displayed every time the monitor is started.

To navigate the main menu:

- Touch the desired item.
- use the side toolbar.

General settings

To open General Settings, tap and drag the bottom of the screen or select the icon From the top bar of the toolbar settings.

Source selection: all image sources are available on the main general settings screen. Active sources are marked with a blue icon[•]. To change the source after Simply tap the desired icon.

NOTE: the PC option is only available when the PC module is properly installed in the socket

Eye Care function: short wavelength blue light rays from displays can cause eye fatigue,

retinal damage and affect vision over time. The Eye Care function was created to take

care of your eyes by being able to

Reduce the intensity of blue light.

To enable the Eye Care function slide the switch to the right.

Adjusting the volume: to adjust the volume, touch and move the volume slider.

Adjust brightness: to adjust the brightness level of the display, touch and move the brightness slider.

℃ —————————————————

Side toolbar

To bring up the toolbar, tap the icon

Basic functions

- to hide the toolbar press

- to go back to the previous screen or to cancel the action performed in the

Θ

- selected applications press
- to return to the home screen press
- to view all enabled applications, press
- to go directly to the Note application press
- to open the menu of available applications, press
- to open and personalize the menu of additional tools

Recent tasks

To view all applications running in the background, press

| | Autok | CLEAR ALL |
|-------------|------------------------|--------------|

you add another tool to bar. With the - button you remove a tool from the sidebar.

Voting/air class function

Touch the icon to enable the voting function/air class. The screen will display QR code window.

To use the tool you need to:

- 1. Connect the interactive monitor to an available network.
- Enable the WiFi function on the devices that will be used to answer questions.
 Then connect them to the same WiFi network as the interactive monitor.

NOTE: all devices must be on the same WiFi network!

3. Scan the QR code or transcribe the address displayed below it into your browser

Internet, in the latest version you can skip this step by going to the website http://class.ifpshare.com and enter the code shown on the monitor screen

- 4. He will enter his name and press Enter to join the class.
- 5. On the interactive monitor, press Enter to start the session.

NOTE: the voting function is for answers only. Questions can be asked, for example, as slides in the Note app, notes on pictures, or verbally.

The tool has the following functions:

- **AR** Voting, with a choice between a single-choice question Choice and multiple .
- Mho's first? indicates the first person who reports through his device.
- Brawing selecting a random person among those logged in. You can also

select several people at once.

- Enables/disables participants to send comments.
 - enables:
 - Redisplay the QR code.

- output from the voting tool.

Voting

For example: Question asked in Note app, answer mode is voting single-choice.

1. To start accepting responses (votes) from participants, click

"Start." The names of the participants who send their answer (voice) will appear as blue icons in the list.

2. Click "Finish" to complete the collection of responses. Displayed response statistics screen will be displayed.

3. Here you can also indicate the correct answer.

Clicking on the "Explain" button will return to the whiteboard.
 Participants will still have a preview of their answers while following the explanations presented on it by the presenter.

First come, first served

The first participant who submits an answer wins, and his name will be displayed On screen.

This function can be used, for example, when reporting an answer or a quiz On Reflex.

Drawing

The application will identify one or more people among all those connected.

Comments

Participants have the option to send text comments, which will appear on the monitor screen.

Note - note-taking application

Press the icon

icon to launch the Note application.

This application is a virtual whiteboard where you can write, draw and also take notes on the inserted images.

- 2. Press the Wallpaper button .
- 3. Select Set as wallpaper.

Dashboard settings

Widgets

You can add application shortcuts and widgets to desktops. To add widgets to the desktop you need to:

- 1. Press and hold the application selected from the sidebar
- 2. Move applications to the home page of the monitor

NOTE: Widgets depend on the installed applications. The manufacturer of the interactive monitor does not guarantee the correct operation of every application and every widget.

Screenshare Pro

ScreenShare Pro is a wireless image transfer application. It allows you to display content from mobile devices and computers on an interactive monitor via a WiFi connection. **NOTES**:

- The devices must be on the same WiFi network.

- Make sure you have an Internet connection. A high-speed Internet connection guarantees fast operation of the image transfer function.

Compatible operating systems:

- Windows 7, 8, 10
- MAC OSX 10.8 or later
- iPhone iOS 9.0 or later
- Android 5.0 or later

Mobile devices

1. Download the ScreenShare Pro app.

On Android and iOS devices, the ScreenShare Pro app can be downloaded from the

Google Play and App stores.

An alternative option is to press the User Guide button and scan the QR code displayed there.

2. Transcribe the code displayed on the monitor into the application to connect to the monitor.

| \$ 3 3 | ScreenShare Pro | • 😔 |
|---------------------|--------------------------------|----------|
| | Powielanie ekranu Połączony | Start |

| | | |
| | | |
| Start mirroring | Desktop synchronization | |

- click **Start mirroring** to start transferring the image from the computer to the interactive monitor.

- click Desktop synchronization to start uploading monitor image

interactive to computer.

Using the application

IMPORTANT: The built-in Android operating system is not a standard system. It has been modified and optimized to work like an interactive monitor. As a result, Google Play is not available.

Installed applications may not work properly. The monitor manufacturer does not guarantee the correct operation of any application installed by the user himself.

To access the other applications, select the one on the sidebar icon.

To install the application by hand, download the APK installation file of the application and run it on the monitor.

It may be necessary to unlock the installation from unknown sources. To do this, use the remote control with the INPUT-1-3-7-9 key combination to launch an additional menu, There, go to the Android page and set "Install unknown sources" to ON.

Calculator

To enable the calculator, select the icon.

Calendar

To enable the calendar, select the icon.

Palette

allows you to replicate brush and crayon drawing and hand blending colors.

Cloud drive

To enable the Cloud Drive application, click the icon.

The Cloud Drive application allows you to add your Google Drive or OneDrive account and quickly upload files from the monitor to it.

ŦŦ

To use the application:

- 1. Click Add Account
- 2. Choose a cloud service: Google Drive or OneDrive

NOTE: an Internet connection is required.

3. Log in to your account by following the instructions on the screen.

Keeper

To enable the Keeper application, click the icon

The Keeper app is used to optimize device memory usage and empty the system of unnecessary data.

System upgrade

Avtek TouchScreen monitors have the ability to update software via the Internet. When the monitor is connected to the Internet, the system will automatically check for new updates.

NOTE: the updates apply to the monitor's internal software with its features, not the Android version. The Android system version is fixed and unchanged over the life of the monitor.

To check for updates manually go to Settings and click on the system tab, then "System Update", there select "Look for updates".
